DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

Previous dependent claims 6, 12, 19, 22, and 30 were objected to as containing allowable subject matter dependent from rejected base claims. These claims have subsequently been rewritten in independent form and are therefore allowed. (See Final Rejection dated 3 June 2005)

For claim 6, the relied-upon prior art does not disclose or suggest, "the step of mapping a respective primitive comprises a step of finding a largest primitive that can be mapped along the respective large scale structure," as claimed, in combination with the other features of the claim.

For claim 12, the relied-upon prior art does not disclose or suggest, "the step of calculating an origin comprises a step of calculating an intersection point of a pair of extrapolated primitives," as claimed, in combination with the other features of the claim.

For claim 19, the relied-upon prior art does not disclose or suggest, " a hash table is used ... and the step of identifying model primitives comprises the steps of: mapping ... identifying ... and inspecting... ," as claimed, in combination with the other features of the claim.

For claim 22, the relied-upon prior art does not disclose or suggest, "the step of calculating a figure of merit comprises a step of calculating an orthogonal projection of the target primitive onto the model primitive," as claimed, in combination with the other features of the claim.

For claim 30, the relied-upon prior art does not disclose or suggest the steps of "defining..., mapping..., and inserting..., " as claimed, in combination with the other features of the claim.
